

Aid™ Acoustics

Ceiling Cloud 40

Trademark and 2024 ©

The Aid™ Acoustics Ceiling Cloud 40, a horizontally-mounted, echo-absorbing panel for ceilings, is made of high-density glass wool with a paint finish. Designed for dual-sided sound absorption, it effectively reduces noise in large, open spaces. Its lightweight design ensures easy installation using corkscrew hangers and cables. Architecturally designed for acoustic efficiency and aesthetic adaptability, the Ceiling Cloud 40 is ideal for commercial and residential environments where sound management and design integrity are crucial.

Technical Specifications

Material	Fiberglass Wool
Standard Dimension	600mm x 1200mm
Standard Thickness	40mm
Density	100 kg/m ³
Edge Detail	Square
Colour	White
Fire-Rated Test	EN 13501-1 = Class A s1, d0
Acoustic Test	ISO 354 = NRC 0.62
